ABOUT YOU

The first few questions are meant to give us information about the people who completed our survey so we will know if there was a variety of people who took part. If there are questions that are uncomfortable for you to answer, please skip to the next question or come back to the question another time. When we share the results of the survey, your answers will be grouped with the answers of the other people that took part so that no one will be able to identify you.
